SUMMARY

Offensive Security Engineer and Penetration Tester with hands-on VAPT experience on live production systems. Skilled in the full attack lifecycle — reconnaissance, exploitation, post-exploitation, and reporting — using Burp Suite, Metasploit, SQLmap, and Kali Linux. Seeking a red team or penetration testing role to find and exploit vulnerabilities before adversaries do.

EXPERIENCE

Cybersecurity Intern — Offensive Security / VAPT

Ansh InfoTech

Jan 2026 – Present

On-site, Ludhiana

- Executed web application penetration tests across 5+ live client systems, identifying 15+ OWASP Top 10 vulnerabilities including SQLi, XSS, IDOR, and broken authentication; documented findings in detailed pentest reports.
- Performed black-box and grey-box network reconnaissance using Nmap and Gobuster, uncovering 10+ exposed services, open ports, and critical misconfigurations in internal infrastructure.
- Conducted CVE-based risk analysis, mapping 20+ findings to CVSS scores and producing remediation-focused reports that reduced client attack surface by an estimated 40%.
- Simulated attacker TTPs including enumeration, privilege escalation, and post-exploitation analysis on 3+ internal systems to evaluate real-world breach impact.
- Analyzed 500+ security log entries and network packets with Wireshark, identifying 8+ indicators of compromise and supporting incident response activities.

Cybersecurity Intern — Virtual

Palo Alto Networks

Jan 2024 – Mar 2024

Remote

- Reviewed enterprise firewall rulesets and network segmentation configurations across 3 simulated environments, identifying 5+ exploitable defensive gaps using an attacker-centric approach.
- Monitored and correlated network traffic and security events, flagging 10+ anomalous behavioral patterns indicative of potential threat actor activity.
- Mapped common offensive techniques against Zero Trust architecture principles, improving depth and accuracy of pentest reporting and remediation recommendations.

TECHNICAL SKILLS

Offensive Tools: Burp Suite, Metasploit, Nmap, SQLmap, Hydra, Gobuster, Nikto, Wireshark, Nuclei

OSINT & Recon: Shodan, Google Dorking, Subfinder, theHarvester

Attack Techniques: OWASP Top 10, SQLi, XSS, IDOR, SSRF, privilege escalation, post-exploitation, CVE analysis, red teaming, lateral movement

Scripting: Python, Bash, C++, JavaScript

Web Stack: HTTP/S, HTML, CSS, SQL, ReactJS, FastAPI

Networking: TCP/IP, VPNs, firewalls, IDS/IPS, traffic analysis, network enumeration

Platforms: Kali Linux, Windows

PROJECTS

VulnForge — Autonomous Penetration Testing Platform	<i>ReactJS, FastAPI, MongoDB</i>
• Built a full-stack AI-augmented pentesting platform integrating 3 OSINT tools (Nmap, Nuclei, Shodan) with Cloudflare Llama-3 AI to automate end-to-end reconnaissance and vulnerability scanning. • Auto-mapped findings to OWASP Top 10, assigned CVSS-based risk ratings, and generated enterprise-grade PDF pentest reports in under 2 minutes — reducing manual reporting time by approximately 70%. • Included a Crypto Lab module for real-time encoding, hashing, and data obfuscation analysis.	

Phishing Website Detection — ML Classifier	<i>Python, XGBoost</i>
• Engineered a phishing detection system achieving 96.68% accuracy and 96.19% precision against a dataset of 10,000+ URLs. • Built a real-time feature extractor analyzing 87 URL and content-based attributes, reducing false positives by approximately 30% compared to baseline models. • Applicable to red team infrastructure vetting and phishing campaign detection in offensive engagements.	

WanderChat — AI Travel Itinerary Generator	<i>ReactJS, FastAPI, Gemini API</i>
• Designed and deployed a full-stack web application serving 100+ users with 90%+ satisfaction on itinerary accuracy. • Engineered a RESTful backend with FastAPI handling 100+ concurrent user sessions, applying secure coding practices and input validation relevant to offensive security tool development.	

EDUCATION

Bachelor of Technology — Computer Science and Engineering Gulzar Group of Institutes, Punjab	<i>Expected May 2026</i>
Senior Secondary (10+2), Dayal Public School PSEB Board	<i>May 2022</i>
Matriculation (Class 10), Dayal Public School PSEB Board	<i>May 2020</i>

CERTIFICATIONS

Ethical Hacking Essentials	EC-Council, 2024
Cybersecurity Virtual Internship	Palo Alto Networks via EduSkills, 2024
